Brainstorm & Idea Prioritization

Brainstorm & Idea Prioritization Template

Ideas were generated around the selected problem statements and then grouped by the stage of the medical diagnostic-center lifecycle they improve.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Selected problem statement: PS-1 – Patient needs a consistent way to register, select a diagnostic test, book an appointment and access reports without incomplete information, conflicting slots or delayed communication.

Step-2: Brainstorm, Idea Listing and Grouping

Idea Group	Brainstormed Ideas	Purpose
Patient Setup	Standard patient registration; mandatory/complete patient information; centralized patient profile	Improve data quality and consistency
Diagnostic Test Setup	Standard diagnostic test catalog; test code, category, price and duration	Make test selection clear and consistent
Appointment Booking	Date/time selection; availability; capacity; duplicate and overlap validation	Prevent booking conflicts
Approval & Processing	Approval workflow; sample collection; laboratory processing	Ensure the complete diagnostic lifecycle works as intended
Report Management	Create/link diagnostic reports; report availability; patient access	Deliver reports consistently
Notifications	Approval and report availability notifications; booking, reminder, cancellation and refund scenarios	Keep patients informed
Payment & Refund	Test-based pricing; payment status; 10% cancellation deduction	Provide transparent payment handling
Security & Validation	ACLs; patient-specific access; dashboard/report validation	Protect data and verify the solution

Step-3: Idea Prioritization

Priority	Idea	Impact	Effort	Decision
1	Standardized Medical Diagnosis Lifecycle	High	Medium	Must have
2	Patient Registration & Diagnostic Test Catalog	High	Low	Must have
3	Appointment Booking & Validation	High	Medium	Must have
4	Approval & Laboratory Processing	High	Medium	Must have
5	Diagnostic Report Management	High	Medium	Must have
6	Email Notifications	Medium	Low	Should have

Priority	Idea	Impact	Effort	Decision
7	Payment & Refund	Medium	Medium	Should have
8	ACL Security & Patient-specific Access	High	Medium	Must have
9	Reports & Dashboard	High	Medium	Must have

Prioritized solution direction: Build the Medical Diagnosis Center lifecycle around standardized patient/test setup first, then add appointment validation, approval, laboratory processing, report delivery, notifications, payment/refund and final security/report validation.
